

Application No. 09/781,901
 Amendment dated July 13, 2005
 Reply to Final Office Action of May 25, 2005

Docket No. 4150-41 00US1

Amendments to the Claims:

Claims 1-308 are pending in this application. Claims 67-71 and 138-308 were withdrawn from consideration. As a result, claims 1-66 and 72-137 are currently being considered. Claims 1, 14, 27, 38, 47, 56, 72, 85, 98, 109, 118 and 127 are independent.

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 (CURRENTLY AMENDED): A method for pointing and clicking through [[a]] an internet virtual directory system to a desired internet web site relating to a search, comprising:

- (i) receiving a display of a first interface comprising, at least 1,000 first level search categories arranged in alphabetical order in a single web page, wherein each of said first level search categories is configured for pointing and clicking to link to no more than 30 second level search categories, alphabet letters A through Z arranged adjacent said first level search categories, and a scroll bar adjacent said first level search categories for navigating through said first level search categories;
 - (ii) pointing and clicking on a first level search category;
 - (iii) receiving a display of a second interface comprising a plurality of said second level search categories corresponding to said first level search category, wherein each of said second level search categories is configured for pointing and clicking to link to no more than 30 third level search categories;
 - (iv) pointing and clicking on a second level search category;
 - (v) receiving a display of a third interface comprising a plurality of said third level search categories corresponding to said second level search category, wherein each of said third level search categories is a uniform research locator configured for pointing and clicking to link to an internet web site;
 - (vi) pointing and clicking on a third level search category; and
 - (vii) receiving a display of a web page of said internet web site corresponding to said third level search category,
- wherein the categories in each of the first, second and third levels are controlled

Application No. 09/781,901
Amendment dated July 13, 2005

Docket No. 4150-41 00US1

pre-selected and uploaded by a service provider of the internet virtual directory system.

2 (ORIGINAL): The method of claim 1, further comprising: (i) pointing and clicking on an alphabet letter; (ii) receiving a display of a group of said first level search categories corresponding to said alphabet letter; and (iii) pointing and clicking on a first level search category from said group of said first level search categories.

3 (ORIGINAL): The method of claim 1, further comprising pointing and clicking on said scroll bar to locate a first level search category.

4 (ORIGINAL): The method of claim 1, wherein said second interface comprises said alphabet letters arranged adjacent said second level search categories.

5 (ORIGINAL): The method of claim 1, wherein said first level search category is displayed in said second interface adjacent said second level search categories.

6 (ORIGINAL): The method of claim 1, wherein said third interface comprises said alphabet letters arranged adjacent said third level search categories.

7 (ORIGINAL): The method of claim 1, wherein a search path is displayed in said third interface adjacent said third level search categories.

8 (ORIGINAL): The method of claim 1, wherein a return bar is displayed adjacent said web page of said internet web site.

9 (ORIGINAL): The method of claim 8, wherein said return bar comprises a return button or icon.

10 (CURRENTLY AMENDED): The method of claim 9, further comprising pointing and clicking on said return button or icon to return to said internet virtual directory system.

11 (ORIGINAL): The method of claim 8, wherein said return bar includes a hide button or icon for hiding said return bar.

Application No. 09/781,901
Amendment dated July 13, 2005
Reply to Final Office Action of May 25, 2005

Docket No. 4150-41 00US1

12 (ORIGINAL): The method of claim 11, further comprising pointing and clicking on said hide button or icon to hide said return bar.

13 (CURRENTLY AMENDED): The method of claim 1, further comprising using a mouse to point and click through said internet virtual directory system.

14 (CURRENTLY AMENDED): A method for pointing and clicking through [[a]] an internet virtual directory system to a desired internet web site relating to a search, comprising:

(i) receiving a display of a first interface comprising, a plurality of first level search categories arranged in alphabetical order in a single web page, wherein each of said first level search categories is configured for pointing and clicking to link to at least one second level search category, alphabet letters A through Z arranged adjacent said first level search categories, and a scroll bar adjacent said first level search categories for navigating through said first level search categories;

(ii) pointing and clicking on a first level search category;

(iii) receiving a display of a second interface comprising at least one second level search category corresponding to said first level search category, wherein each second level search category is configured for pointing and clicking to link to at least one third level search category;

(iv) pointing and clicking on a second level search category;

(v) receiving a display of a third interface comprising at least one third level search category corresponding to said second level search category, wherein each third level search category is a uniform research locator configured for pointing and clicking to link to an internet web site;

(vi) pointing and clicking on a third level search category; and

(vii) receiving a display of a web page of said internet web site corresponding to said third level search category

wherein the categories in each of the first, second and third levels are ~~controlled~~ pre-selected and uploaded by a service provider of the internet virtual directory system.

hide button or icon to hide said return bar.

26 (CURRENTLY AMENDED): The method of claim 14, further comprising using a mouse to point and click through said internet virtual directory system.

27 (CURRENTLY AMENDED): A method for pointing and clicking through an internet virtual directory system to a desired internet web site relating to a search, comprising:

(i) receiving a display of a first interface comprising, a plurality of first level search categories arranged in alphabetical order in a single web page, wherein each of said first level search categories is configured for pointing and clicking to link to at least one second level search category, and alphabet letters A through Z arranged adjacent said first level search categories;

(ii) pointing and clicking on an alphabet letter;

(iii) receiving a display of a group of first level search categories corresponding to said alphabet letter;

(iv) pointing and clicking on a first level search category selected from said group of first level search categories;

(v) receiving a display of a second interface comprising at least one second level search category corresponding to said first level search category, wherein each second level search category is configured for pointing and clicking to link to at least one third level search category;

(vi) pointing and clicking on a second level search category;

(vii) receiving a display of a third interface comprising at least one third level search category corresponding to said second level search category, wherein each third level search category is a uniform research locator configured for pointing and clicking to link to an internet web site;

(viii) pointing and clicking on a third level search category; and

(ix) receiving a display of a web page of said internet web site corresponding to said third level search category

wherein the categories in each of the first, second and third levels are connected

(viii) transmitting a display of a web page of said internet web site corresponding to said third level search category

wherein the categories in each of the first, second and third levels are entered ~~pre-selected and uploaded~~ by a service provider of the internet virtual directory system.

110 (ORIGINAL): The method of claim 109, wherein said first level search category is displayed in said second interface adjacent said second level search categories.

111 (ORIGINAL): The method of claim 109, wherein a search path is displayed in said third interface adjacent said third level search categories.

112 (ORIGINAL): The method of claim 109, wherein a return bar is displayed adjacent said web page of said internet web site.

113 (ORIGINAL): The method of claim 112, wherein said return bar comprises a return button or icon.

114 (CURRENTLY AMENDED): The method of claim 113, further comprising: (i) receiving a click command from said return button or icon to return to said internet virtual directory system; and (ii) transmitting a display of said third interface.

115 (ORIGINAL): The method of claim 112, wherein said return bar includes a hide button or icon for hiding said return bar.

116 (ORIGINAL): The method of claim 115, further comprising: (i) receiving a click command from said hide button or icon to hide said return bar; and (ii) transmitting a display of said web page without said return bar.

117 (ORIGINAL): The method of claim 109, further comprising receiving said click commands from a mouse.

118 (CURRENTLY AMENDED): A method for providing ~~[[a]]~~ an internet virtual directory system to a desired internet web site relating to a search, comprising:

Application No. 09/781,901
Amendment dated July 13, 2005
Reply to Final Office Action of May 25, 2005

Docket No. 4150-4 00US1

(i) transmitting a display of a first interface comprising a plurality of first level search categories, wherein each of said first level search categories is configured for pointing and clicking to link to at least one second level search category;

(ii) receiving a click command to select a first level search category;

(iii) transmitting a display of a second interface comprising at least one second level search category corresponding to said first level search category, wherein each second level search category is configured for pointing and clicking to link to at least one third level search category;

(iv) receiving a click command to select a second level search category;

(v) transmitting a display of a third interface comprising at least one third level search category corresponding to said second level search category, wherein each third level search category is a uniform research locator configured for pointing and clicking to link to an internet web site;

(vi) receiving a click command to select a third level search category; and

(vii) transmitting a display of a web page of said internet web site corresponding to said third level search category

wherein the categories in each of the first, second and third levels are ~~controlled~~ pre-selected and uploaded by a service provider of the internet virtual directory system.

119 (ORIGINAL): The method of claim 118, wherein said first level search category is displayed in said second interface adjacent said second level search categories.

120 (ORIGINAL): The method of claim 118, wherein a search path is displayed in said third interface adjacent said third level search categories.

121 (ORIGINAL): The method of claim 118, wherein a return bar is displayed adjacent said web page of said internet web site.

122 (ORIGINAL): The method of claim 121, wherein said return bar comprises a return button or icon.

Application No. 09/781,901
Amendment dated July 13, 2005
Reply to Final Office Action of May 25, 2005

Docket No. 4150-4 00US1

123 (CURRENTLY AMENDED): The method of claim 122, further comprising: (i) receiving a click command from said return button or icon to return to said internet virtual directory system; and (ii) transmitting a display of said third interface.

124 (ORIGINAL): The method of claim 121, wherein said return bar includes a hide button or icon for hiding said return bar.

125 (ORIGINAL): The method of claim 124, further comprising: (i) receiving a click command from said hide button or icon to hide said return bar; and (ii) transmitting a display of said web page without said return bar.

126 (ORIGINAL): The method of claim 118, further comprising receiving said click commands from a mouse.

127 (CURRENTLY AMENDED): A method for providing ~~[[a]]~~ an internet virtual directory system to a desired internet web site relating to a search, comprising: (i) transmitting a display of at least one interface comprising a plurality of search categories; (ii) receiving a click command to select a search category; and (iii) transmitting a display of a web page of an internet web site corresponding to said search category wherein the search categories are ~~controlled~~ pre-selected and uploaded by a service provider of the internet virtual directory system.

128 (ORIGINAL): The method of claim 127, wherein said interface further comprises alphabet letters A through Z arranged adjacent said search categories.

129 (ORIGINAL): The method of claim 128, further comprising: (i) receiving a click command to select an alphabet letter; (ii) transmitting a display of a group of search categories corresponding to said alphabet letter; and (iii) receiving a click command to select a search category from said group of search categories.

130 (ORIGINAL): The method of claim 127, wherein said interface further comprises a scroll bar adjacent said search categories for navigating through said search categories.

Application No. 09/781,901
Amendment dated July 13, 2005
Reply to Final Office Action of May 25, 2005

Docket No. 4150-4 00US1

131 (ORIGINAL): The method of claim 130, further comprising receiving a click command and to control said scroll bar to locate a search category.

132 (ORIGINAL): The method of claim 127, wherein a return bar is displayed adjacent said web page of said internet web site.

133 (ORIGINAL): The method of claim 132, wherein said return bar comprises a return button or icon.

134 (CURRENTLY AMENDED): The method of claim 133, further comprising: (i) receiving a click command from said return button or icon to return to said internet virtual directory system; and (ii) transmitting a display of said interface.

135 (ORIGINAL): The method of claim 132, wherein said return bar includes a hide button or icon for hiding said return bar.

136 (ORIGINAL): The method of claim 135, further comprising: (i) receiving a click command from said hide button or icon to hide said return bar; and (ii) transmitting a display of said web page without said return bar.

137 (ORIGINAL): The method of claim 127, further comprising receiving said click command from a mouse.

138-308 (CANCELLED):

309 (NEW): A method for providing an internet virtual directory system to a desired internet web site relating to a search, comprising: (i) transmitting a display of more than one interface, wherein each interface comprises a plurality of search categories; (ii) receiving a click command to select a search category for each of said interfaces; and (iii) transmitting a display of a web page of an internet web site corresponding to said search category wherein said search categories for each interface are preselected and uploaded by a service provider of said internet virtual directory system.

Application No. 09/781,901
Amendment dated July 13, 2005
Reply to Final Office Action of May 25, 2005

Docket No. 4150-4 00US1

310 (NEW): The method of claim 309, wherein said each interface further comprises alphabet letters A through Z arranged adjacent said search categories.

311 (NEW): The method of claim 310, further comprising: (i) receiving a click command to select an alphabet letter; (ii) transmitting a display of a group of search categories corresponding to said alphabet letter; and (iii) receiving a click command to select a search category from said group of search categories.

312 (NEW): The method of claim 309, wherein said each interface further comprises a scroll bar adjacent said search categories for navigating through said search categories.

313 (NEW): The method of claim 312, further comprising receiving a click command to control said scroll bar to locate a search category.

314 (NEW): The method of claim 309, wherein a return bar is displayed adjacent said web page of said internet web site.

315 (NEW): The method of claim 314, wherein said return bar comprises a return button or icon.

316 (NEW): The method of claim 315, further comprising: (i) receiving a click command from said return button or icon to return to said internet virtual directory system; and (ii) transmitting a display of said interface.

317 (NEW): The method of claim 314, wherein said return bar includes a hide button or icon for hiding said return bar.

318 (NEW): The method of claim 317, further comprising: (i) receiving a click command from said hide button or icon to hide said return bar; and (ii) transmitting a display of said web page without said return bar.

319 (NEW): The method of claim 309, further comprising receiving said click command from a mouse.
